

How to Delete VPN on Samsung Android for data roaming usage

This setting is applicable to Samsung Galaxy all models with Android 7 OS (or earlier)/ this method can solve the problem when the user uses mobile phone abroad but can't surf the internet because the phone has set VPN of that country

* in case of using other phone model Android 7 OS => recommend to look for VPN menu in (Settings) => (More) and follow steps starting from no 5.

1. Go to Settings

2. Select Connections

SETT	INGS				
B	Connection WAFI, Blueto	o ns oth, Data usage, Airp	lune mode		
40	Sounds a Sounda, Vibr	nd vibration ation. Do not disturb			
đ	Notifications Block, allow, prioritize				
6	Display Brightness, Blue light filter. Home screen				
Ð	Wallpapers and themes Wallpapers, Themes, Icona				
•	Advanced features Games, One-handed mode				
0	Device maintenance Battery, Storage, Memory				
88	Apps Default apps, App permissions				
ð	Lock screen and security Lock screen, Face Recognition, Fingerprints, Iris				
D	Cloud and accounts Samsung Cloud, Backup and restore, Smart Sw.
