

How to Forward Port on Thomson TCW770 Cable Modem

1. Open a Browser 
2. Type 192.168.1.1 in the address bar then enter “admin” for username and “password” for password
3. Click Advanced on the top

4. click Forwarding on the left

5. Select the Service Name then click Add and set up the Start Port, End Port as you wish

Advanced

Forwarding : This allows for incoming requests on specific port numbers to reach web servers, FTP servers, mail servers, etc. so they can be accessible from the public internet. A table of commonly used port numbers is also provided.

Known Rule Adder

Local IP Address: Service Name:

Local IP Adr	Start Port	End Port	Protocol	Enable	
<input type="text" value="192.168.1.0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="Both"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text" value="192.168.1.0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="Both"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text" value="192.168.1.0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="Both"/>	<input type="checkbox"/>	<input type="checkbox"/>
