INTERNET CONNECTION

Use this section to configure your Internet Connection type. There are several connection types to choose from: Static IP, DHCP, PPPoE, PPTP, and L2TP. If you are unsure of your connection method, please contact your Internet Service Provider.

Note : If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.

Save Settings Don't Save Settings

INTERNET CONNECTION TYPE

Choose the mode to be used by the router to connect to the Internet.

My Internet Connection is : Dynamic IP (DHCP) ▼

DYNAMIC IP (DHCP) INTERNET CONNECTION TYPE

Use this Internet connection type if your Internet Service Provider (ISP) didn't provide you with IP Address information and/or a username and password.

Host Name : DIR-605L

MAC Address : 00 - 00 - 00 - 00 - 00 - 00 (optional)

Copy Your PC's MAC Address

Primary DNS Server : 0.0.0.0

Secondary DNS Server : 0.0.0.0 (optional)

MTU : 1500 bytes MTU default 1500

Save Settings Don't Save Settings

5. Select Advanced Port Forwarding Rules and set up and press Save Settings

- Place a check mark at the using Service
- Name : enter the Service name e.g. CCTV
- IP Address : enter IP address of device to Forward to
- Port : enter Port
- Traffic Type : select Any
