

## Set up True SMART 4G P1 Series to share Internet via Wi-Fi

This setting can apply to True SMART 4G P1 Series, True SMART 4G CHAMPION and other True SMART 4G with Android 8.0

1. On main screen, tap ^ to view all Apps

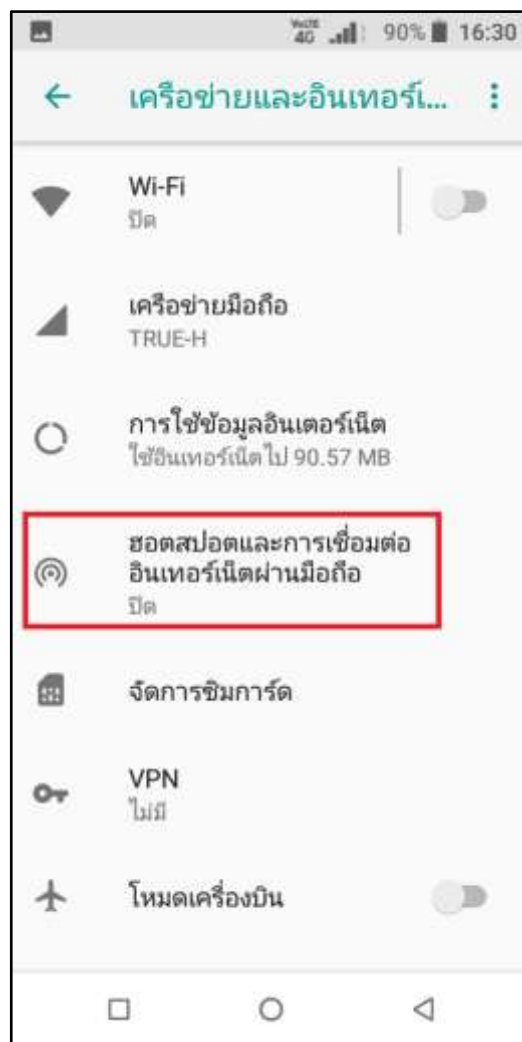

2. Tap (Settings)

### 3. Tap (Network & Internet)

### 4. Tap (Hotspot & tethering)

5. To set up, tap (Wi-Fi hotspot settings and user management)

6. And then (Set up Wi-Fi hotspot)

7. Set up as follows:

- Network name
- Security :
  - None
  - WPA PSK
  - WPA2 PSK : by default
- Password : contain at least 8 characters, if choose None, no need for password setup
- Select AP Band : between 2.4GHz and 5 GHz
- Max Connections : 1 – 8 devices
- When finished, tap Save

8. To see the password, tap (Show password)

9. Once completed, tap **(SAVE)**

10. Back to (Hotspot and tethering), tap a button to turn **(On)**

11. A button turns green and there'll be a sign at top left corner (Tethering or hotspot active)

12. Manual Settings: at (Connected Users) it'll show number of device if there's connected device, device name, IP number, Wi-Fi MAC of that device, tap this

13. It'll show device name, IP number, Wi-Fi MAC include following options:

- Block : block this device not be able to connect this Wi-Fi hotspot
- ADD WHITILIST : add this device to be able to connect this Wi-Fi hotspot (depend on input the correct password)

14. At (Notification Center), (Tethering or hotspot active) will appear

15. At (Wi-Fi hotspot settings and user management) below will have (WhiteList Device List), tap (+ Manually Add WhiteList Device)

16. Management device

- Device Name : enter device name
- Device Mac : Wi-Fi MAC of that device
- **From test result:** even name and Wi-Fi MAC has been entered => but the password is changed later => that device can't connect that hotspot : have to re-enter new password
