

Set Mac Filter on ZTE F688

1. Type 192.168.1.1 at Browser and press Enter

- Username = admin
- Password = enter letters shown in Default Router Password (each ZTE model will vary)
- Press Login

2. Status > Local Network

The screenshot shows the ZTE router's web management interface. At the top, the 'Local Network' tab is selected, indicated by an orange arrow. Below the navigation bar, there is a 'WAN Setting' section with a diagram showing a 'Firewall' connected to a router. A 'Device List' sidebar on the left contains options for 'WLAN Devices', 'LAN Devices', and 'VoIP Devices'. The main content area displays a 'WLAN Device List' table with columns for Name, MAC Address, IPv4 Address, and IPv5 Address.

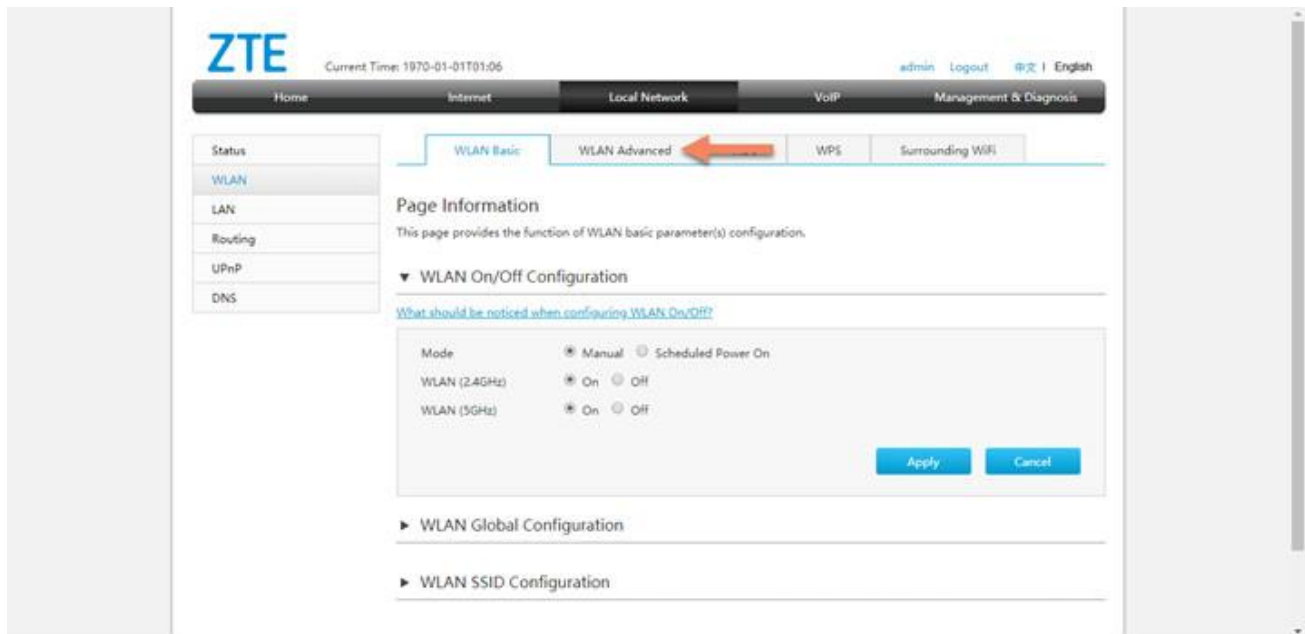

3. Go to WLAN

The screenshot shows the ZTE router's web management interface with the 'LAN' status page selected. An orange arrow points to the 'WLAN' option in the left sidebar. The main content area displays 'Page Information' and 'LAN Information' for two ports: LAN1 and LAN2.

Ethernet Port		LAN1
Status		Up/1000Mbps/Full Duplex
Bytes Received/Sent		1478426/5139812
