

วิธีการดู IP WAN ของ Thomson

1. พิมพ์ 192.168.1.1 ที่ช่อง Address แล้ว Enter
2. พิมพ์ Username=admin, Password=password
3. คลิกเมนู Network TAB

4. คลิกเมนู WAN > ดู IP Address ที่ WAN

A screenshot of the Thomson router's "Network" configuration page, specifically the "WAN" section. On the left is a sidebar menu with options: LAN, WAN, Computers, DDNS, Time, FTP Diagnostics, Portbase, and PassThrough. A red arrow points to the "WAN" option. The main content area is titled "Network" and "WAN : This page allows configuration and status of the internal DHCP client for the WAN." Below this, the "WAN" section shows fields for "IPv4 Address:" (with a red arrow pointing to the input field), "MAC Address:" (00:26:24:ed:a9:c2), "Duration:" (D: -- H: -- M: -- S: --), and "Expires:". There are two buttons: "Release WAN Lease" and "Renew WAN Lease". Below these are "WAN Connection Type" (set to DHCP), "MTU" (0), and "Spoofed MAC Address" (00:00:00:00:00:00) with an "Apply" button.
