

How to use 4G Pocket WiFi via Wi-Fi

1. Prepare 4G Pocket WiFi

2. On the left hand is the slot for opening device's cover

3. Once opened, take the battery off, you'll find

Sticker at the back

- Model name : 4G Pocket WiFi
- SSID : true_pocketwifi_4F1B
(each one is different)
- Password : 73189089
- Wi-Fi Mac Address :
60:EF:xx:62:4F:1B
- IMEI : 35194907xxx9089

Sticker at the cover

- SSID : true_pocketwifi_4F1B
(each one is different)
- Password : 73189089

4. Insert SIM Card (SIM : micro SIM), SIM slot is on the right, slot for Micro SD Card is on the left

5. Insert battery and then close the cover

6. Press Power button

7. Press and hold the button until 4 LEDs are blinking and then release Power button

- Mobile Network
- Wi-Fi network distribution
- SMS notification
- Battery status

8. Wait a moment until 4 LEDs are green and off

9. Once LED is on, it will be the last one (battery) which means it's starting up and connecting the network

10. The 2nd LED (Wi-Fi) will be green but the 1st LED (mobile network) is still red which means it's connecting mobile network

11. Wait a moment until 1st, 2nd and 4th LED are green which means it's ready to use
- 3rd LED (SMS) will be green when there's incoming SMS but not yet read

12. Prepare the device to connect to 4G Pocket WiFi, if use iPhone, go to [Settings]

13. Select [Wi-Fi]

14. Tap Wi-Fi, device will search for nearby Wi-Fi network, select true_pocketwifi_4F1B

15. Enter [Password] and then tap [Join]

16. Wait a moment

17. Once connected, there'll be a check mark in front of Wi-Fi name, test using internet

18. At 1st LED 4G Pocket WiFi (mobile network) will blink if there's a device connected to and internet is using
