

Manage File Explorer on True Super Talkie 4G

1. On main screen, select (Menu)

2. Select (Organizer)

3. And then (File Explorer)

4. File Explorer : files separated by 4 folders

- Audio = all audio files : .wav, .mp3, .arm etc.
- Images = all image files : .jpg, bmp etc.
- Video = all video files : .3gp, .mp4 etc.
- Documents = all document files : MS-Word, MS-Power point, PDF etc.

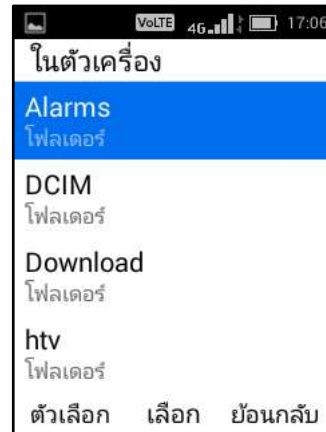

5. Go down to the last 2 menu : files on phone and SD Card

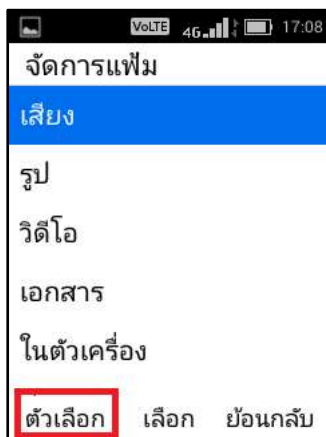

- Local = folder and files on True Super Talkie 4G
- External Storage = folder and files on external storage: Micro SD Card

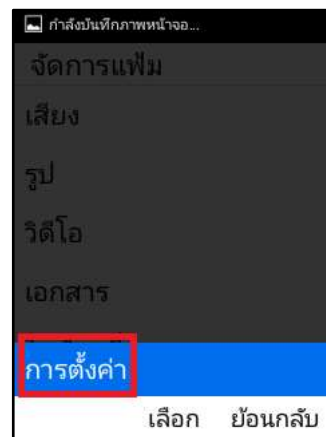

6. To check files on phone, choose **(Local)**

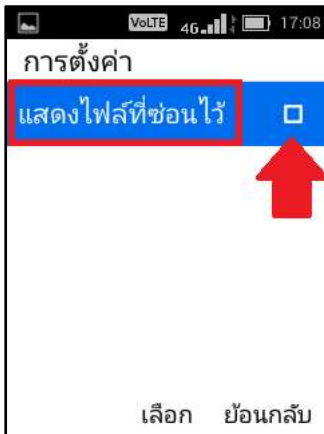

7. To show folder or hidden file: at (File Explorer), choose **(Options)**

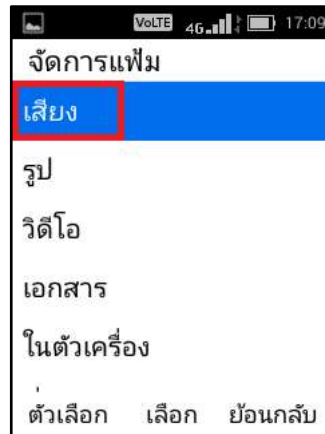

8. And then **(Settings)**

9. At (Settings), click a check at (Show hidden files)

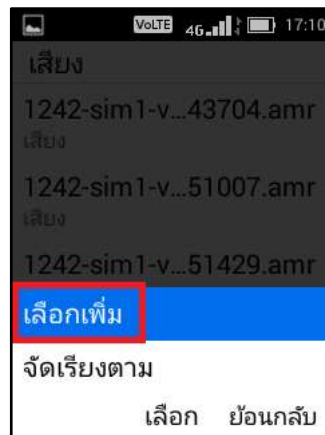

10. At (File management): (File Explorer) choose file ex. choose (Audio)

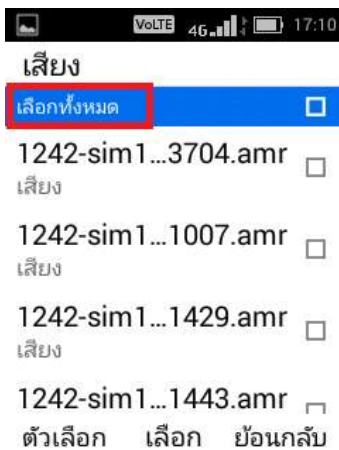

11. At (Audio), choose (Options)

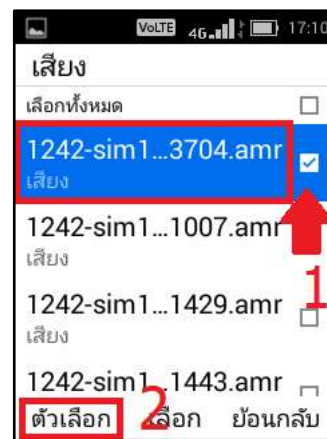

12. Then (Select more)

13. File options:

14. Select 1 file and select (Options)

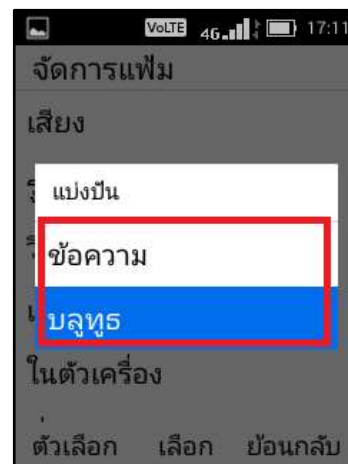

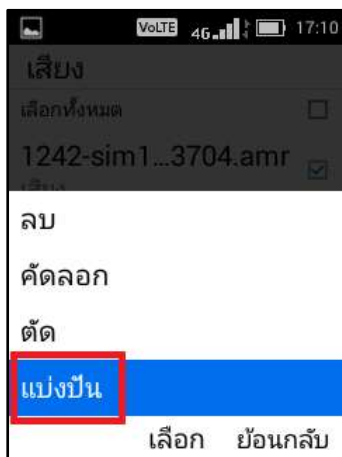

15. Menu option, choose (Share)

- Delete = delete file
- Copy = copy file to preferred location
- Cut = move file to preferred location
- Share = share file via Bluetooth or Messaging

16. Select channel to share file

- Messaging = share through MMS
- Bluetooth = share through Bluetooth

What you should know:

To share file, if choose file from (Local) or (External Storage), some files may not be shared. For example, Bluetooth channel will not show e.g. voicecall file if choose file from (Local) > voicecall > file > share > no Bluetooth channel

Solution : recommend to choose file from folder => choose (Audio) > audio files > voicecall file > share > Bluetooth channel
