- 5. Tap preferred Wi-Fi network e.g. choose .@ TRUEWIFI
- 6. System will connect Wi-Fi and a check mark will appear in front of .@ TRUEWIFI > a fan sign appears at top right corner = connected Wi-Fi : before using, need to enter username and password (but for general Wi-Fi, if at the first time already entered the password, the internet can be used now)

 Wait for a while, Web Browser will display Landing Page for logging in, enter Username, Password and then tap (LOGIN)

 If correctly enter Username and Password, system will lead to (Login Success) page and showing details of package

Test surfing the internet e.g. access to various websites

 Delete Wi-Fi network : while connecting
 Wi-Fi, tap a sign (>) at the right of that network
