

Use SOS button on True Super Talkie 4G

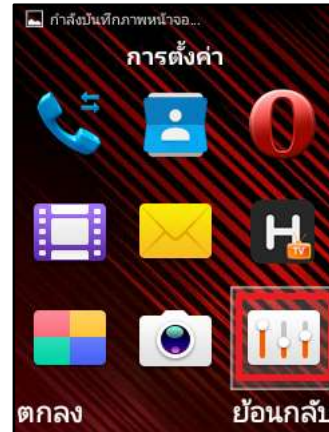

To use SOS button, the user needs to enable GPS on device first

SOS setting

1. On main screen, select **(Menu)**

2. Select **(Settings)**

3. And then **SOS**

4. SOS page

- Emergency rescue : Off = left / On = right
- Number Setting : can set 3 numbers for emergency contact
- Emergency Message : sent out message in case of emergency
- Location : attach location when using SOS or not : Off = left / On = right
- Help : SOS usage suggestion

5. Click turn on (Emergency rescue)

6. Select (Number Setting)

7. Enter emergency number, press (Save)

8. Back to SOS again and choose (Emergency Message)

9. Enter (Emergency Message) and then press (Save)

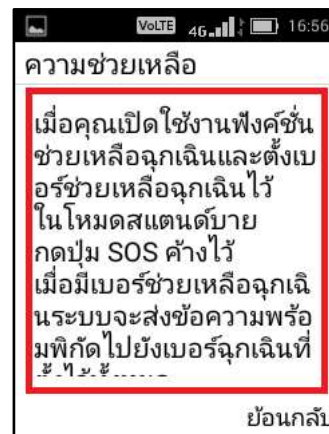

10. Back to SOS again and choose (Location)

11. Select (Help)

12. (Emergency rescue) message, press (Back) to exit this page

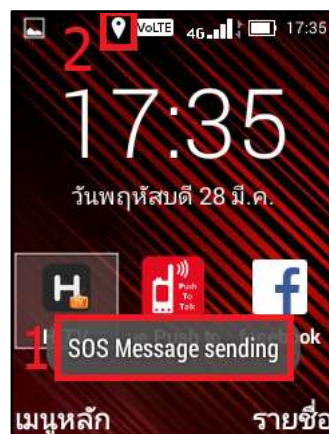

Use SOS button

1. Press and hold SOS button (on the left of device)

2. True Super Talkie 4G on screen will show

- SOS Message sending
- GPS sign at the top (searching location)
- Release SOS button

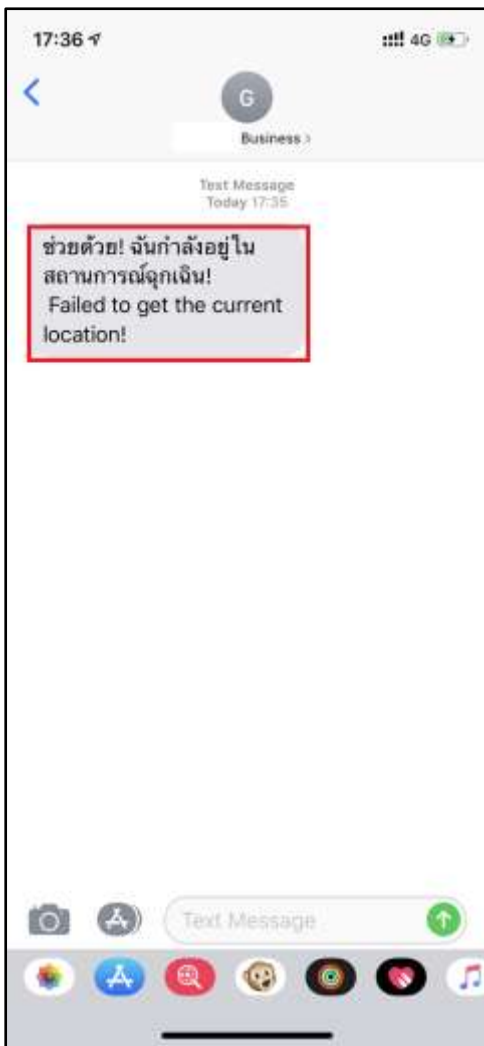

3. Wait around 2 - 8 seconds

4. System will send a message to emergency number and “message sent!” will show on True Super Talkie 4G

5. Destination device that is set for emergency number will get emergency rescue message. If True Super Talkie 4G is in the area that can't find GPS, system will not be able to detect location, a message "Failed to get the current location!" will appear

6. For instance, True Super Talkie 4G is outdoor and can detect location, the destination device will get location including emergency rescue message, so he can tap the message to load Google Map at the time message sent

7. System will open Google Map showing the location of True Super Talkie 4G (1) and the current location of destination device that received the emergency message (2)
