Internet

Use this section to configure your Internet Connection type. There are several connection types to choose from Static IP, DHCP, PPPoE, PPTP, L2TP and DS-Lite. If you are unsure of your connection method, please contact your Internet service provider. Note: If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.

Settings >> Internet

VLAN IPv6 **Save**

My Internet Connection is: **Dynamic IP (DHCP)**

Advanced Settings...

Host Name:

Primary DNS Server: **203.144.207.49**

Secondary DNS Server: **203.144.207.29**

Internet Connected

Click on any item in the diagram for more information.

The diagram shows a network topology with three nodes: 'Internet' (represented by a globe icon), 'DIR-842' (represented by a router icon), and 'Connected Clients: 0' (represented by a smartphone icon). A green checkmark is placed on the line connecting 'Internet' and 'DIR-842', indicating a successful connection.
